LET'S START WITH SQL :)

The general order of SQL commands

Sno	Command	Usecase
1.	SELECT	Retrieve from the database
2.	FROM	Identify the table
3.	WHERE	Filter rows based on some conditions
4.	GROUP BY	Group rows that have the same values
5.	HAVING	Filter groups based on some conditions
6.	ORDER BY	Sort the result set either aesc/desc
7.	LIMIT	Limit the number of rows returned
